

Tasmanian Seed Conservation Centre. Seed Safe Collecting List

Native & Non-native Species desired for collection as of 03-Nov-06

| Taxa | Endemic? | Taxa | Endemic? | Taxa | Endemic? |
|----------------------------------|-------------------------------------|-----------------------------------|-------------------------------------|-----------------------------------|-------------------------------------|
| Native Species | | Allittia cardiocarpa (pr1) | <input type="checkbox"/> | Gnaphalium polycaulon | <input type="checkbox"/> |
| | | Ammobium calyceroides | <input checked="" type="checkbox"/> | Helichrysum milliganii | <input checked="" type="checkbox"/> |
| AMARANTHACEAE | | Apalochlamys spectabilis (pr1) | <input type="checkbox"/> | Helichrysum pumilum (pr1) | <input checked="" type="checkbox"/> |
| Hemichroa pentandra (pr2) | <input type="checkbox"/> | Argentipallium dealbatum (pr1) | <input type="checkbox"/> | Hyalosperma demissum | <input type="checkbox"/> |
| APIACEAE | | Argentipallium obtusifolium (pr2) | <input type="checkbox"/> | Isoetopsis graminifolia | <input type="checkbox"/> |
| Actinotus bellidioides (pr2) | <input type="checkbox"/> | Argyrotegium fordianum | <input type="checkbox"/> | Lagenophora montana (pr2) | <input type="checkbox"/> |
| Actinotus moorei | <input checked="" type="checkbox"/> | Argyrotegium nitidulum | <input type="checkbox"/> | Lagenophora stipitata (pr1) | <input type="checkbox"/> |
| Actinotus suffocatus (pr2) | <input type="checkbox"/> | Argyrotegium poliochlorum | <input type="checkbox"/> | Leptinella filicula | <input type="checkbox"/> |
| Anisotome procumbens | <input checked="" type="checkbox"/> | Bedfordia linearis (pr1) | <input checked="" type="checkbox"/> | Leptinella longipes (pr1) | <input type="checkbox"/> |
| Apium insulare (pr1) | <input type="checkbox"/> | Brachyglottis brunonis | <input checked="" type="checkbox"/> | Leptinella plumosa | <input type="checkbox"/> |
| Azorella macquariensis | <input type="checkbox"/> | Brachyscome aff. radicans | <input type="checkbox"/> | Leptinella reptans (pr1) | <input type="checkbox"/> |
| Centella cordifolia (pr2) | <input type="checkbox"/> | Brachyscome angustifolia | <input type="checkbox"/> | Leptorhynchos nitidulus (pr2) | <input type="checkbox"/> |
| Dichosciadium ranunculaceum | <input type="checkbox"/> | Brachyscome decipiens | <input type="checkbox"/> | Microseris lanceolata (pr1) | <input type="checkbox"/> |
| Diplaspis cordifolia | <input checked="" type="checkbox"/> | Brachyscome diversifolia (pr2) | <input type="checkbox"/> | Millotia muelleri | <input type="checkbox"/> |
| Diplaspis hydrocotyle | <input checked="" type="checkbox"/> | Brachyscome perpusilla | <input type="checkbox"/> | Millotia tenuifolia (pr1) | <input type="checkbox"/> |
| Eryngium ovinum (pr2) | <input type="checkbox"/> | Brachyscome radicans | <input type="checkbox"/> | Odixia achlaena | <input checked="" type="checkbox"/> |
| Hydrocotyle callicarpa | <input type="checkbox"/> | Brachyscome radicata | <input type="checkbox"/> | Odixia angusta | <input checked="" type="checkbox"/> |
| Hydrocotyle capillaris | <input type="checkbox"/> | Brachyscome sieberi | <input type="checkbox"/> | Olearia algida (pr2) | <input type="checkbox"/> |
| Hydrocotyle comocarpa | <input type="checkbox"/> | Cassinia trinerva (pr1) | <input type="checkbox"/> | Olearia archeri | <input checked="" type="checkbox"/> |
| Hydrocotyle hirta (pr2) | <input type="checkbox"/> | Celmisia saxifraga | <input checked="" type="checkbox"/> | Olearia ericoides | <input checked="" type="checkbox"/> |
| Hydrocotyle laxiflora (pr2) | <input type="checkbox"/> | Centipeda cunninghamii (pr2) | <input type="checkbox"/> | Olearia glutinosa (pr1) | <input type="checkbox"/> |
| Hydrocotyle muscosa (pr2) | <input type="checkbox"/> | Centipeda elatinoidea (pr2) | <input type="checkbox"/> | Olearia ledifolia | <input checked="" type="checkbox"/> |
| Hydrocotyle novae-zeelandiae | <input type="checkbox"/> | Cotula alpina (pr1) | <input type="checkbox"/> | Olearia lepidophylla (pr1) | <input type="checkbox"/> |
| Hydrocotyle pterocarpa (pr2) | <input type="checkbox"/> | Cotula australis (pr1) | <input type="checkbox"/> | Olearia myrsinoides (pr1) | <input type="checkbox"/> |
| Hydrocotyle sibthorpioides (pr2) | <input type="checkbox"/> | Cotula vulgaris (pr2) | <input type="checkbox"/> | Olearia obcordata | <input checked="" type="checkbox"/> |
| Hydrocotyle tripartita | <input type="checkbox"/> | Craspedia alpina (pr1) | <input type="checkbox"/> | Olearia persoonioides | <input checked="" type="checkbox"/> |
| Lilaeopsis polyantha (pr2) | <input type="checkbox"/> | Craspedia coolaminica (pr1) | <input type="checkbox"/> | Olearia phlogopappa (pr1) | <input type="checkbox"/> |
| Oreomyrrhis argentea (pr2) | <input type="checkbox"/> | Craspedia glabrata | <input checked="" type="checkbox"/> | Olearia pinifolia | <input checked="" type="checkbox"/> |
| Oreomyrrhis ciliata (pr2) | <input type="checkbox"/> | Craspedia preminghana (pr1) | <input checked="" type="checkbox"/> | Olearia tasmanica | <input checked="" type="checkbox"/> |
| Oreomyrrhis gunnii | <input checked="" type="checkbox"/> | Cymbonotus preissianus (pr2) | <input type="checkbox"/> | Ozothamnus antennaria | <input checked="" type="checkbox"/> |
| Oreomyrrhis sessiliflora | <input checked="" type="checkbox"/> | Erigeron gunnii | <input checked="" type="checkbox"/> | Ozothamnus argophyllus (pr2) | <input type="checkbox"/> |
| Oschatzia saxifraga | <input checked="" type="checkbox"/> | Erigeron pappocromus | <input checked="" type="checkbox"/> | Ozothamnus bracteolatus | <input checked="" type="checkbox"/> |
| Trachymene humilis (pr2) | <input type="checkbox"/> | Erigeron stellatus | <input checked="" type="checkbox"/> | Ozothamnus costatifructus | <input checked="" type="checkbox"/> |
| Xanthosia pilosa (pr2) | <input type="checkbox"/> | Erigeron tasmanicus | <input type="checkbox"/> | Ozothamnus ericifolius | <input checked="" type="checkbox"/> |
| Xanthosia tasmanica (pr2) | <input type="checkbox"/> | Erigeron trigonus | <input checked="" type="checkbox"/> | Ozothamnus expansifolius | <input checked="" type="checkbox"/> |
| Xanthosia ternifolia (pr2) | <input type="checkbox"/> | Euchiton argentifolius | <input type="checkbox"/> | Ozothamnus ledifolius | <input checked="" type="checkbox"/> |
| Xanthosia tridentata (pr2) | <input type="checkbox"/> | Euchiton collinus (pr1) | <input type="checkbox"/> | Ozothamnus lycopodioides | <input checked="" type="checkbox"/> |
| APOCYNACEAE | | Euchiton involucratum (pr2) | <input type="checkbox"/> | Ozothamnus purpurascens | <input checked="" type="checkbox"/> |
| Parsonsia brownii | <input type="checkbox"/> | Euchiton litticola | <input checked="" type="checkbox"/> | Ozothamnus reflexifolius | <input checked="" type="checkbox"/> |
| ARALIACEAE | | Euchiton sphaericus | <input type="checkbox"/> | Ozothamnus reticulatus | <input checked="" type="checkbox"/> |
| Polyscias aff. sambucifolia | <input type="checkbox"/> | Euchiton traversii | <input type="checkbox"/> | Ozothamnus rodwayi (pr2) | <input checked="" type="checkbox"/> |
| Pseudopanax gunnii | <input checked="" type="checkbox"/> | Euchiton umbricola | <input type="checkbox"/> | Ozothamnus rosmarinifolius (pr1) | <input type="checkbox"/> |
| ASTERACEAE | | Ewartia catipes | <input checked="" type="checkbox"/> | Ozothamnus selaginoides (pr1) | <input type="checkbox"/> |
| Abrotanella forsteroides | <input checked="" type="checkbox"/> | Ewartia meredithiae | <input checked="" type="checkbox"/> | Picris angustifolia | <input type="checkbox"/> |
| Abrotanella scapigera | <input checked="" type="checkbox"/> | Ewartia planchonii | <input checked="" type="checkbox"/> | Pseudognaphalium luteoalbum (pr1) | <input type="checkbox"/> |
| | | Gnaphalium indutum (pr2) | <input type="checkbox"/> | | |

What am I looking for in a seed collection?

The Seed Safe program aims to make collections of 10,000 to 20,000 seeds without impacting heavily on the total production of seed that is set in that year.

For some species these targets may never be achievable due to the species scarcity or reproductive rate. However even for these more difficult species, collections of a useful size can be made by targeting the right population. What we need is to identify large, healthy populations that are flowering/fruitletting well.

How do I determine a potentially good seeding population?

You can probably get a fair idea of how much seed is available by doing the following:

Collect a few fruits: Are the seeds mature? Are the seeds full? How many seeds in a fruit/portion of seedhead? Roughly calculate how much seed there is on an average size plant?

Assess your site: (Roughly) How many plants are there? What proportion are in fruit? What proportion are in flower? Is seed dispersal already happening?

By recording these items you can quickly gain a feel for the potential of your collecting site.

The Seed Conservation Department of the Royal Botanic Gardens Kew have designed a checklist sheet for this type of evaluation. A copy of this pre-collection checklist is included with the email distributing this list.

For more information on seed collecting check out the RBG Kew, Millennium Seed Bank Project field manual at <http://www.kew.org/msbp/internat/fieldmanual.html>

A fully downloadable version of this text can be found at <http://www.kew.org/msbp/internat/fieldmanual.pdf>

If you spot a good population or sites with multiple seeding targets please contact one of the following people.

James Wood
Seed Bank Co-ordinator
Tasmanian Seed Conservation Centre
Royal Tasmanian Botanical Gardens
