TASMANIAN FIELD NATURALISTS CLUB INC.

G.P.O. Box 68A, Hobart, Tas. 7001

Founded 1904

OBJECTS

The Tasmanian Field Naturalists Club aims to encourage the study of all aspects of natural history and to advocate the conservation of our natural heritage. The club is comprised of both amateur and professionals who share a common interest in the natural world.

ACTIVITIES

Members meet each month in the Biological Sciences Building at the University of Tasmania Sandy Bay. These meetings include a guest speaker who provides an illustrated talk. This is followed by an excursion on the next Saturday to a suitable site to allow field observations of the subject of that week's talk. A mammal survey group also undertakes trapping and recording of native mammals each month. The Clubs' committee coordinates input from members of the Club into management plans and other issues of interest to members.

THE TASMANIAN NATURALIST

The Club publishes the journal, *The Tasmanian Naturalist*. This journal provides a forum for the presentation of observations on natural history and views on the management of natural values in both formal and informal styles. Examples of material included are flora and fauna surveys, observations of unusual or unknown aspects of a species' natural history, overviews of contemporary issues, views on the management of natural values and book reviews.

MEMBERSHIP

Membership of the Tasmanian Field Naturalists Club Inc. is open to any person interested in natural history. *The Tasmanian Naturalist* is distributed free to all members, the club's library is available for use and a quarterly bulletin is issued with information covering forthcoming activities. Enquiries regarding membership should be sent to The Secretary at the above address or to the Clubs' President Don Hird can be contacted by phoning 344293.
